

What kind of Anemia?

There are as many codes for anemia as there are causes. These codes help determine the accuracy of the billing and data collection, just as the cause helps determine the treatment.

Some examples:

- ♥ Aplastic anemia
- ♥ Anemia due to acute blood loss
- ♥ Chronic blood loss anemia
- ♥ Anemia in end stage renal disease
- ♥ Iron deficiency anemia

**Please specify the type of anemia.
if it is not **“DOC”**umented, it can't be coded!**
